CO&M Group

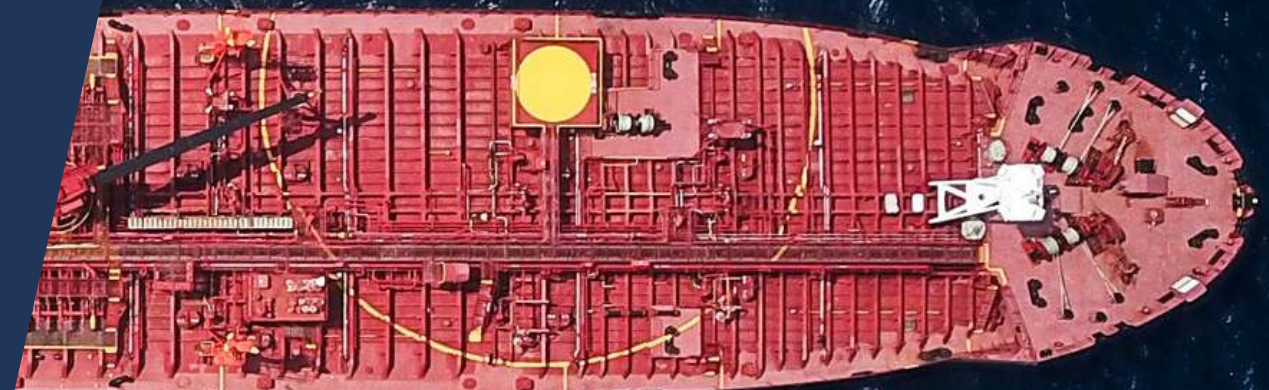

ABOUT US

CO&M Group was established in 2017 with a longstanding tradition in the sectors of Oil and gas, Marine, and Industrial services. Today, our company has consolidated its partnerships in Asia, South America, North, and West Africa, Bahrain, Saudi Arabia, and the United Arab Emirates.

We organize and manage the Operation and Maintenance of facilities from industries such as oil & and gas, conventional and nuclear power generation, and mining.

CO&M has become a trusted, independent partner of major international energy companies and other clients who have chosen to focus on their core activities.

O&M SERVICES

General Maintenance

Preventive maintenance also extends the life span of equipment and assets,

Management

Planning and monitoring of operational performance development and improvement

Quality Control

Technical advisory and inspection services. Commissioning and testing supervision

Budgeting

Optimization of the resources, equipment and organization structure

Personnel

Recruitment and training of personnel. HR, short and long-term planning at the department level.

CATHODIC PROTECTION DIVISION

With years of experience in the industry, CO&M Group's Cathodic Protection Division is your trusted partner for corrosion prevention. Our team of experts has a deep understanding of the challenges faced by various industries, and we offer tailored solutions to meet your specific needs.

Our Cathodic Protection Division offers a comprehensive range of services to protect your assets from corrosion. From design and installation to inspection and maintenance, we provide end-to-end solutions that ensure the long-term integrity and reliability of your infrastructure.

APPLICATION FIELDS

OIL & GAS

PC systems are essential for eliminating fouling in piping on circuits that use seawater to cool the auxiliary systems, such as engines and pumps. T.

ICCP systems are used to protect the hull and the turret against corrosion. Sectors: Drilling Platform, FLNG, LNG, FSO, FPSO, FRSU, Support Vessels, retrofit projects, onshore pipelines, Oil and gas storage facilities, refineries.

Maritime industry

Avoiding corrosion in a harsh ocean environment often requires the use of cathodic protection methods. One such system, impressed current cathodic protection (ICCP), mitigates corrosion by applying an external current to a ship hull. The efficiency of this method depends on factors such as the use of a coated propeller.

Sectors: Military & Civil vessels, Ports Facilities.

Industry

In the energy and steel industries and in all industrial complexes with components that use seawater in the supply and cooling circuits, ACG systems can be used as anti-fouling systems to protect them.

Sectors: Sea Water Processing, Steel Mills, Paper Mills, Power Plants.

Consultancy and Engineering

Expertise you can rely on

We have a strong tradition and vocation in services for cathodic protection. With our highly skilled engineers specialized in corrosion, naval architecture, marine engineering, and structural design, we are equipped to undertake a wide range of projects in corrosion, maritime, and industrial sectors.

PROFESSIONAL TEAM

Our team stays up-to-date with the latest advancements in the field, ensuring that you receive the most effective and efficient corrosion prevention measures available. We offer:

- NACE Inspectors
- Corrosion Engineers
- Cathodic Protection Technicians and Supervisors.

FUTURE

At CO&M Group, we understand the critical importance of ensuring full cathodic protection throughout the entire design life of a structure. Whether it's designing a new structure, retrofitting modifications, or extending the life of an existing one, our team will ensure that your project is equipped with the most effective cathodic protection solutions.

TRUST AND AVAILABILITY

When you choose CO&M as your partner for cathodic protection solutions, you can trust that we will deliver exceptional quality, reliability, and customer service. We are committed to exceeding your expectations every step of the way.

Get in touch with our team today to discuss your cathodic protection requirements and discover how we can assist you in safeguarding your assets against corrosion.

THANK YOU
